

Cemento

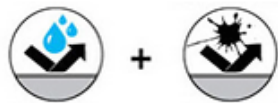

Surface Treatments

The following treatments can be applied on request:

IDROPROTECTOR Waterproof

Emulsion of nanoparticles made of silicon and titanium molecules. Green, water based, it makes the Cemento finish waterproof.

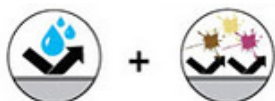

IDROSTRAIN-R Waterproof + Stain Resistant

Emulsion of nanoparticles made of silicon and fluorine polymers molecules. Green, water based, it makes the Cemento finish waterproof and stain-resistant.

IDROSELF-A Waterproof + Stain Resistance + Self Cleaning Anti-bacterial

Suspension of nanoparticles made of silicon and silicates nano-structured molecules. Green, water based, it makes the Cemento finish anti-bacterial and self-cleaning, perfect for external application such as Ventilated Facade.

100% SEALED Waterproof + Stain resistance for flat surfaces

Made of acrylic polymers. A thin layer of protective film gives Cemento an excellent resistance to any kind of stain. Can be cleaned with common aggressive cleaners.
